

## CONFERENCE

### « STUDIES OF THE EARTH AND NEAR-EARTH ENVIRONMENT USING THE SATELLITE TRACKING DATA»

Institute of astronomy of the RAS (INASAN), 48 Pyatnitskaya str., Moscow

#### October 2

Chair: B.Shustov

- 10:30 – 13:00    **A.Massevich** (Russia) *Observations of first satellites.*
- S.Tatevian** (INASAN, Russia), J. Zielinsky ( CBK PAN, Poland) *The influence of space technologies on scientific achievements in geodesy and geodynamics.*
- I. Imar** (Konkoly Observatory, Hungary) *Weather reacting to the Geomagnetic storms?*
- S.Revnivykh** (Mission Control Center, RSA) *Satellite navigation system GLONASS and its scientific applications.*
- 13:00 – 15:00    *Lunch*
- 15:00 – 17:00    **L. Sehnal** (Chech Academy of Sciences) - *MIMOSA Project: First results.*
- G.Demianov** (Central Institute of Geodesy and Mapping, Russia) *Fundamental Geodetic network in Russia.*
- L.Rykhlova** (INASAN, Russia) *Problems of space debris.*
- N. Bahtigaraev, S. Barabanov, B.Shustov** (INASAN, Russia) *Scientific program of satellites observations at Zvenigorod Observatory.*
